Subject: Fwd: Fernald LLW Shipments to NTS

Attached is the schedule for low-level radioactive waste shipments that DOE-Fernald plans to make to the Nevada Test Site using routes through southern California. Trucks will travel cross-country along I-40, entering California near Needles and connecting with US 95 to Clark County, Nevada. Trucks will re-enter California on Nipton Road and connect with I-15. At this point, trucks will either travel north on I-15 back into Nevada and connect with Nevada Route 160 to US 95 to NTS, or they will drive south to CA SR 127 at Baker. The trucks will go north on CA 127 to Nevada, continuing on NV 373.

We have told DOE that there is very limited emergency response capability along these routes in California. They are aware of the road conditions since we forwarded to them Caltrans report on SR 127. However, they are continuing to plan to use these routes in California.

DOE has offered to provide a one-day emergency response training course to people along routes in California. Rich Osborne at OES is coordinating this training effort.

Barbara,

Per our discussion I am sending you the proposed low level waste shipping forecast for the period January 31, 2000 through March 27, 2000. Please note this is subject to change.

WEEKLY FERNALD SHIPMENTS TO NTS

Week of Jan. 31	7 Shipments
Week of Feb. 7	7 Shipments
Week of Feb. 14	8 Shipments
Week of Feb. 21	7 Shipments
Week of Feb. 28	5 Shipments
Week of Mar. 6	5 Shipments
Week of Mar. 13	5 Shipments
Week of Mar. 20	5 Shipments
Week of Mar. 27	5 Shipments

Mike Kopp
